Marble & Granite

# about the product

[www.ericmaritime.com](http://www.ericmaritime.com)

*Granite and Marble are two popular natural stones used in construction and interior design, granite is a durable and versatile material that is known for its strength and resistance to scratches and heat. Marble, on the other hand, is a softer stone that is prized for its elegant appearance and unique veining patterns. Both materials come in a range of colors and finishes, making them ideal for a variety of applications such as countertops, flooring and wall cladding.*
