

ALFALFA

IN **ERIC** YOU CAN FIND
2 TYPES OF ALFLFA

1- ALFALFA PELLETS

2- ALFALFA HAY

PRODUCT INFORMATION

Our premium Alfalfa Hay and pellets are the ideal choice for livestock owners who are seeking high-quality, nutrient-rich feed for their horses and cattle. Our carefully harvested and dried hay retains maximum nutritional value, while our pellets are made from the same premium alfalfa for consistent quality and taste.

Rich in protein, vitamins, and minerals, our products provide a balanced source of essential nutrients that promote healthy digestion and ensure your animals stay healthy and strong. Whether used as a primary feed source or as a supplement, our Alfalfa Hay and pellets are a nutritious and beneficial choice for livestock owners looking to provide their animals with the best possible care.

ORIGIN

EGYPT – Farafra – Sharq El Owainat

COMPOSITION

100% alfalfa (*Medicago sativa*) GMO FREE

ALFALFA PELLETS

SHAPE AND PACKAGING

Pellet diameter 4, 6, 8 mm

Available in:

25 kg bags on pallet of 50-1250 KG PER pallet
container 40 feet HC 27.5 ton

ALFALFA HAY

Available in:

18 kg per bale

FOR Average from 430 bales to 450 bales to 9 tons

35 kg per bale

Container load 40 feet HC 350 bales = 12.25 tons

400 kg per bale

containers load 40 feet hc 29 bales = 11.60 tons

CHEMICAL ANALYSIS OF ALFALFA PELLETS

ELEMENTS OF CHEMICAL ANALYSSIS	MEASURE
protein	17-19%
fibers	25.5%
minerals	12.85%
fats	2.85%
moisture	8.6%
calcium	1.37%
phosphorous	0.27%

CHEMICAL ANALYSIS OF ALFALFA HAY

ELEMENTS OF CHEMICAL ANALYSSIS	MEASURE
protein	17-19%
fibers	25.5%
minerals	12.85%
fats	2.85%
moisture	8.6%
calcium	1.37%
phosphorous	0.27%
width	2-2.10m
Hight	90cm
weight	no more than 400kg for one pallet

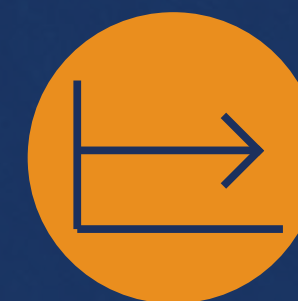

BENEFITS

Thanks to its content of high quality protein and the fiber digestibility, alfalfa is a key component of the feed ration. Harvesting alfalfa at early ripening age and subsequently dehydrating it allow to preserve the green plant digestible nutrients, therefore to increase forage nutritional intake.

Guarantee if GMO free protein in the feed ration
Guarantee of a safe and healthy forage, sanitized during dehydration
Absence undesirable bodies, of mold and fermentation
Palatability and uniform quality during long time period
Time saving in the TMR preparation
100% exploitable feed, 0% waste
a ration based on alfalfa is indispensable for the growth of healthy and long-living animals and guarantees quality milk, meat and eggs..

ideal for young horses, sport horses and lactating mares.

uniform and durable product.

easy handling and no lose of the product.

optimum conservation.

control of food safety, quality and traceability.

improves the quality of milk.

retrench of space, more amount of dry matter in less space .

pellets with 17-19% crude protein.

SUGGESTED FOR:

- lactation
- growing

- lactation
- growing

- gestation
- lactation
- performance

- gestation
- growing

- egg layers

- lactation
- growing

- fattening

USE IN

Alfalfa is the forage crop par excellence, employed in the nutrition of all types of livestock animals: dairy and beef cattle, sheep and goat, camels and buffaloes, horses, poultry, rabbits and fish. Alfalfa pellet can be administered as a ready feed combined with other components of the animal diet, or crushed and added as ingredient in mixed feeds.

The daily dosage depends on the animal to be fed and its life stage, and it is calibrated on the overall content of the diet.

For optimal results we advise to follow the veterinarians' suggestions..
